

## **FURTHER INSPECTOR REQUESTS FOR WWDC**

### **TABLE 2**

Please look at Table 2 on pages 51-55 to see whether you would now be in a position to update this. In particular there is a target for several of the policies which refer to halting the rising trend in obesity and then it says for source and frequency "to be determined". There are also some entries "to be developed" for policies WR3 and WR4

### **SUGGESTED CHANGES**

The Council suggest additions to the text on page 9 of the DPD. However, these documents are already referenced in Appendix 4 of the DPD, pp. 84/5, with different wording. This appears to be an unnecessary duplication. Please would the Council clarify their intentions?

There is no reference in the SCs to Table 1 on page 50 of the DPD. This appears to require updating.

The Inspector is concerned about the nature and format of the suggested replacement policy YP1. In particular the statement, also in the submitted DPD, that "further targets and indicators will be derived from this strategy". It might be expected that as the strategy has been published any additional, and appropriate, targets and indicators should be included in the DPD.

The Inspector noticed that an error in the table of existing development plan policies to be superseded by the WW L&R DPD has been carried through in the suggested replacement Appendix 6 on page 28 of the Council's suggested changes (SC41).

Early on the Inspector pointed out that policies R1, CA2 and CA3 had NOT been saved by the Secretary of State. Yet these 3 policies are still listed in the right hand column. R1 against LP1 and CA2&3 against CR3. This requires correction before publication.
